

360 Workplace

Portal

Promote your property and improve communication

Maintaining a website often involves complicated software, IT departments, or expensive update fees. With these barriers, it can be difficult to find a solution that allows you to effectively inform your current tenants and present the right image to potential tenants.

As part of 360Facility, Portal eliminates barriers by providing an easy-to-use tool that novices can use to maintain and update your property website with no software to purchase or install.

Keep Tenants Up-to-Date

Use quick calendaring for specific and timely event notification, as well as mass communication capabilities.

Control Your Information

Define and customize roles and security settings to individuals or user groups and share property documents on your website.

Highlight Your Property

Market your property on the web and create unlimited custom pages.

Keep Tenants Informed

Inform existing tenants of public information and interests, such as key building contracts, emergency preparedness, cafeteria menus and building policies.

Streamline Set Up and Maintenance

With no IT software to purchase or install, use attractive and contemporary website templates to create a website that coordinates with existing marketing materials and building logos.

360Facility has been found to reduce maintenance budgets by up to 35%
