

Asset Detail Report

REPORT DESCRIPTION

The report provides a list of Asset Master records which not only includes asset specifics such as Status, Category/Subcategory, Description plus additional fields. In addition, it also lists individual work order history reflecting the description of work, date, overall costs, as well as completion comments.

INFORMATION IN USE

- All required TMS asset fields
- Manufacturer identification fields
- Location of asset
- Purchase information
- Labor Cost
- Material Cost
- Warranty Information

REFERENCE ITEMS

- Requires accurate and consistent entry and editing of asset records
- Standardization is a must

IMPORTANT NOTE

Failure to standardize and maintain accurate asset records will cause incorrect / unnecessary negative results within the report.
