Asset Risk Defaults with PM Frequency

REPORT DESCRIPTION

This report provides the established risk number by Asset Category / Sub-category combination for reference to ensure it is within established guidelines for the site. This information can be used to ensure PM is correctly scheduled for assets within the database.

This is not a standard report included within TMS OnSite/TMS OnLine. It can be developed using the C1 Report Designer software provided by Four Rivers Software should you have the resource to do so. Additional documentation to guide you through the development of the report will be provided upon request. If you would like modifications to the report as shown, a report creation request may be submitted to our Services Department via techsupport@frsoft.com for creation and delivery to you. This allows the user to verify the current Risk Management Number is in accordance with the organization standards and all PMs are in place.

INFORMATION IN USE

- Asset Category Code
- Asset Category Description
- Asset SubCategory Code
- Asset SubCategory Description
- Associated Risk Strategy for Asset Cat/SubCat
