

Assets Added - This Month and Last Month

REPORT DESCRIPTION

This is not a standard report included within TMS OnSite/TMS OnLine. It is easily build within the framework of TMS should you have the resource to do so. Additional documentation to guide you through the development of the report will be provided upon request. The below listed fields are pulled directly from a completed asset record.

If you would like modifications to the report as shown, a report creation request may be submitted to our Services Department via techsupport@frsoft.com for creation and delivery to you.

A listing of Assets purchased and added to the database covering the current and previous month. The results are sorted by Asset Number and Purchase date.

INFORMATION IN USE

- Asset Number
- Asset Description
- Date Purchased
- Account Code
- Category Code
- Subcategory Code
- Asset Rick Number

REFERENCE ITEMS

- Standardized Category/Subcategory
- Standardized Description - Use of standardized subcategory for Biomed ECRI could be beneficial)
- Standardized asset number scheme
- Full use of all asset records

IMPORTANT NOTE

Effective setup of Asset records within TMS is a must. Asset record information drives numerous reports and must be a top priority concerning accuracy and comprehensiveness.
