

Expesite Mobile App

SIMPLIFY WORK MANAGEMENT

Access and update project information in the field: add comments, modify statuses, push dates out or up, and plan ahead.

TRACK TIME AS WORK HAPPENS

Leverage streamlined functionality to complete tasks and milestones in the field and to easily manage documents.

INCREASE EFFICIENCY

Spend less time entering data and uploading site photos in the office and instead complete those deliverables on the fly in the field.

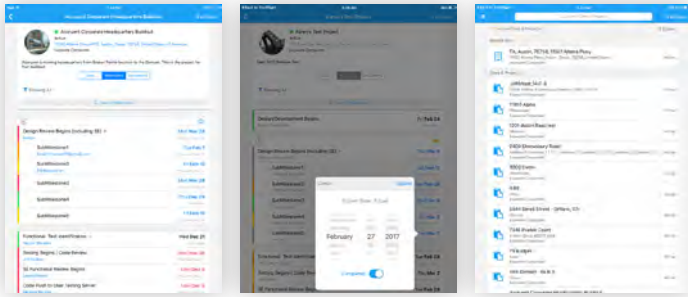

STREAMLINE DATA ENTRY

Decrease the time required to complete forms by using the mobile app in the field.

ENHANCE VISIBILITY

Update tasks, milestones, and documents, notifying team members in real time of any changes to your projects

HOW THE APP IMPROVES YOUR DAY

The Exesite mobile app enhances productivity for construction and project managers in the field managing projects by giving the flexibility to:

- Update schedule assignments and dates
- Uploading and editing photos taken in the field
- Mark up photos or other documents
- Send notifications to team members on key project changes
- Update task assignments, dates, statuses
- Comment on tasks
- Search, filter, and sort through various elements of project and site data

WHAT YOU SHOULD LOOK FORWARD TO

Future functionality will be based on the dynamic needs within the market. At this time, future features may include:

- Support for custom project information
- Support for custom task types
- Viewing team module for quick access to contact info
- Creating adhoc tasks

HOW THE MOBILE APP WORKS WITH EXPESITE

The mobile app serves as an additional resource for project field personnel like construction or project managers, engineers, vendors, and architects. Exesite functionality not featured in the mobile app is still available in the web browser.

From a technical standpoint, the app functions as a separate code base that communicates directly with your Exesite's database installation. The app code sends and receives project data to and from your database via APIs. Data is not stored locally on a user's devices.

HOW YOU GET STARTED

Exesite Support will survey all customers to understand which accounts would like to use the app and which configuration settings should be applied.

The mobile app is a free download from the app store. Project and construction managers should be using iPads running iOS version 9.1+

Exesite is a cloud software solution designed to enable you to manage all aspects of your facility to improve your team's efficiency and reduce costs, ultimately while driving profitability from the core of your organization.
