Fire Extinguisher Location on Map

REPORT DESCRIPTION

This report works with information within a TMS CAFM drawing and an established link with TMS OnSite CMMS via TMS CAFM Portal allowing someone to generate a printout of a floor showing locations of fire extinguishers.

This is not a standard report included within TMS CAFM and requires the use of Portal with TMS OnSite/OnLine to ensure accurate locations. This is a report that must be build using the available report designer within TMS CAFM. If you would like the original report as shown or any modifications a report creation request may be submitted to our Services Department via techsupport@frsoft.com for creation and delivery to you. The below listed fields are all standard fields used within TMS.

INFORMATION IN USE

- Asset Number
- Asset Description
- Legends with TMS CAFM

REFERENCE ITEMS

- Clear descriptions of assets and correct locations are a must
- TMS CAFM Portal must be installed and configured
- Effective management of all drawings and data within the CMMS asset records must be maintained for effective reporting.

IMPORTANT NOTE

Failure to correctly maintain the necessary drawings and asset records will cause incorrect/unnecessary negative results within the report.
