CONNECTIV

TRANSFORMATIVE CMMS & ASSET MANAGEMENT DESIGNED EXCLUSIVELY FOR HEALTHCARE

Connectiv is a modern, cloud-based, silo-busting solution. With Connectiv, you can consolidate your HTM, HFM, and IT to a single user experience to transform the patient experience, gain real-time visibility, optimize work productivity and ensuring compliance with changing policies, laws, and regulations.

Build automation with drag and drop workflow and report creation

Leverage native analytics for insights and better decision making

Modernize the way technicians work with mobile capabilities inspired by popular consumer apps

Optimize and automate processes with integrations built on secure APIs

now CERTIFIED

CONNECTIV'S MODERN USER INTERFACE PROVIDES IMPROVED DATA CONSISTENCY & EASE-OF-USE

Co-created with engineers, technicians, and leadership from healthcare organizations, Connectiv is a mobile-enabled, cloud-based solution that manages all aspects of healthcare asset and facilities management (facility and biomedical equipment), work order management, financials and expenses, preventative maintenance, risk and compliance reporting, equipment distribution and more.

DRAG & DROP WORKFLOWS

Connectiv's Drag and Drop Workflow Editor automates multi-step processes that occur between any combination of people and systems to help hospitals achieve better outcomes. Make the processes that drive your operations more effective and efficient with end-to-end automation.
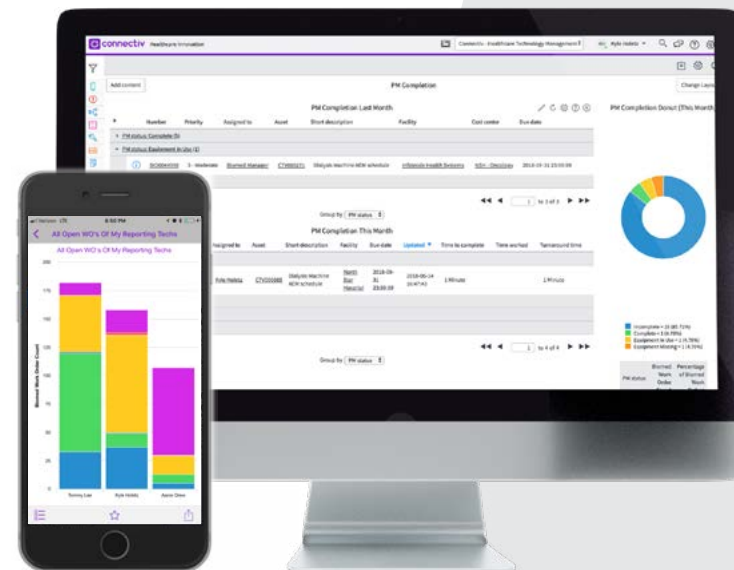

BROWSER AGNOSTIC

With an easy-to-use interface, users can quickly select responses and minimize data entry errors, on and off-line. Capture and update information in the field quickly and effortlessly, in real-time, from any iOS or Android device.

SERVICE REQUEST PORTAL

Streamline and optimize requests, equipment distribution and workflow for all departments of hospital operations and support services, including:

- Biomedical Clinical Engineering
- Facilities Plant Operations
- Environmental Services
- Equipment Distribution
- Supply Chain/Materials Management
- Linens, Dietary, Security and Patient Belongings
- Courier Service
- Warehouse Operations
- Translator Services

FLEXIBLE INTEGRATIONS

Optimize and automate processes with an open API, including:

- Plug & Play RTLS Integration Framework (e.g., Midmark, Stanley, Cetani)
- Parts Vendor Interfaces including PartsSource, and GE Healthcare Service Shop.
- Documentation (oneSource)
- Product Recalls and Alerts (ECRI & Other Providers).
- Network Monitoring Tools including Zingbox, Asimily, ORDR, CyberMDX and Medigate.
- Enterprise Resource Planning including Lawson, Peoplesoft and Workday.
- Time and Attendance including Kronos.

VISUALIZE KEY PERFORMANCE INDICATORS

An integrated view of your system via dashboards, reports, and notifications to better understand your processes and drive continual improvement. Track, aggregate and visualize key performance indicators over time, rather than reporting on a single point in time including

- Cost of Service Ratio
- Environment of Care
- Worker Productivity
- Workload Balancing

now CERTIFIED

CONNECTIV MOBILE

Connectiv Mobile empowers technicians to enter and update preventative and corrective maintenance work orders as the work is being performed in the field – eliminating redundancy, minimizing errors, and saving time. Users create, retrieve, update documentation and materials, and enter time changes all while remaining in the field – even offline when internet is not available.

FUNCTIONALITY

- Real-time PM Compliance
- Offline Data Collection
- Scan Asset Barcodes
- Talk-to-text Capability
- Attached Asset Pictures & Documentation
- Notifications & Alerts
- Perform Complete Inspection Points
- Create & Complete Work Orders
- Record Meter Readings
- Parts and Inventory Capture

CONNECTIV MOBILE

Prevent garbage in/garbage out with easy-to-use drop downs, technicians can quickly select responses and minimize data entry errors. Capture and update information in the field, quickly and effortlessly.

GO BEYOND CMMS AND ASSET MANAGEMENT

Ensure compliance, mitigate risk & maximize resource utilization to control costs.

OPTIMIZE OPERATIONS

- Manage and optimize asset lifecycles.
- Improve equipment uptime.
- Increase technician productivity.
- Improve operational and financial performance through staffing, parts and contract management.

AUTOMATE PROCESSES

- Automated Alternative Equipment Maintenance (AEM).
- Automate processes and activities.
- Automate the service request and equipment distribution process and consistently achieve SLAs.

MITIGATE RISK

- Ensure compliance and mitigate risk.
- Ensure data standardization and consistency.
- Improve cybersecurity risk mitigation and remediation

ELEVATE PERFORMACE

- Improve visibility and availability.
- Provide foundation for accurate equipment capital plans.
- Smart hospital automation with integrations and the Internet of Things (IoT).

"Connectiv has helped us improve our maintenance and parts procurement processes so that we are able to provide safer, more modern equipment in the best possible condition, increasing the efficiency of clinicians and enhancing the lives of our patients."

– Robin Shilkey, Database Analyst, Biomedical Engineering
