

A DAY IN THE LIFE OF AN EMS USER

1 Peter is on his way to the main office by train.

2 He pulls out his phone and uses the EMS mobile app to choose a desirable office space for the day.

3 When he arrives at the office, Peter realizes he isn't exactly sure where his space is. He goes to a kiosk, pulls up the office map, and heads to the right place.

4 As he is working, Peter discovers there is a big client meeting coming up next week. At his desk, he opens the EMS web application.

SCHEDULE CHECKER		ROOM AVAILABILITY		CREATES A VC LINK	
DATE	TIME	ROOM ID	ROOM #	ROOM ID	ROOM #
Jan	1	Room1B	0		
Jan	1	Room1C	1		
Paul	0	Room1D	0		
Tom	0	Room1E	0		
Steven	1	Room2A	1		
Ushu	0	Room2B	1		
Adrianne	0	Room3A	0

Laptops	QTY 20
Pens	QTY 20
Stickers	QTY 20

DO YOU NEED CATERING SERVICES?	
YES	NO
Seating Size	12
Drinks	YES
Decor	YES
Shower	YES
Highline	YES

5 From here Peter can make a reservation by checking people's schedules, picking a room from the floor plan, and adding a video conference link for remote colleagues. He also can request additional equipment and reserve catering services.

6 The following week, when Peter arrives at the meeting room, he checks in via the room sign to let colleagues know the room is in use.

7 Not only was all the necessary equipment set up, but the space is the perfect temperature, thanks to integration with IoT remote monitoring.

8 On his way out, he frees up the room for the next person via the digital sign and leaves to celebrate the newly signed deal.
