

Mobile Surveying and Inspections Application for Manufacturers

ENSURE CONSISTENT CONDITION SURVEYS, INSPECTIONS
AND LIFECYCLE ASSET MANAGEMENT ACROSS YOUR ENTERPRISE

Kykloud is a mobile surveying and inspections application that ensures consistent condition surveys, inspections and lifecycle asset management across your entire portfolio. Kykloud's full capital planning suite includes mobile data collection, property management, lifecycle and budget planning, and a real-time reporting engine.

Consistent Condition
Surveys & Inspections

Increased Data Collection
Speed & Accuracy

Consistent Compliance,
Safety & Operational
Standards

Accurate Asset Lifecycle
& Capital Planning

ACCURATE, UPDATED FACILITY AND ASSET CONDITION ASSESSMENTS

In the manufacturing industry, it can be challenging to collect the right information and create valuable reports in a timely fashion. Kykcloud replaces traditional handwritten notes and manual spreadsheets to increase project delivery time and improve client communication capabilities. With Kykcloud's compliance capabilities, manufacturers can uphold quality standards across their operations and identify maintenance, safety and regulatory issues before they become costly repairs or lawsuits. The solution provides full visibility into the creation, issuing and completion status of assessments with easy-to-use project management tools. Kykcloud provides manufacturers the knowledge and data required to make informed decisions about maintenance and planned spend for the future.

CUSTOMIZABLE TEMPLATES

- Build survey forms and templates
- Automate assessment workflows and processes
- Introduce risk and condition criteria—complete with field validation and calculations
- Control data quality from inception

POWERFUL REPORTING

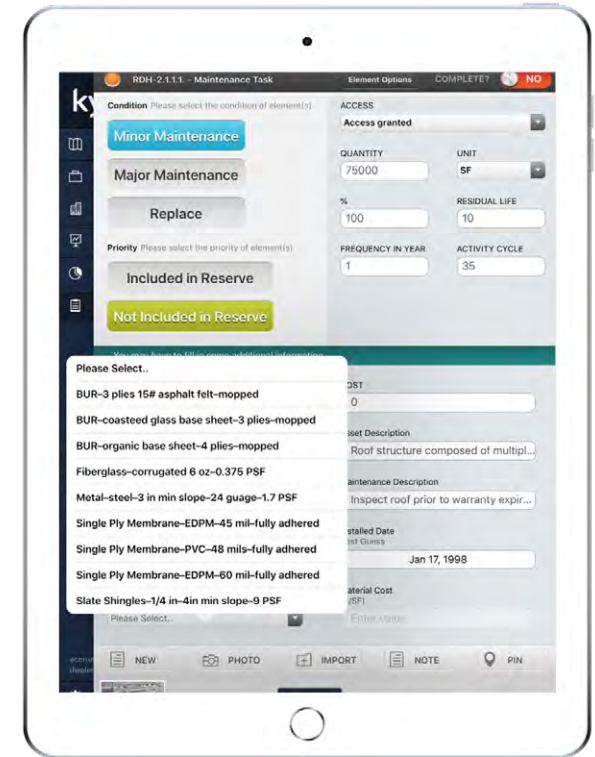

- Turn surveys and assessments into professional, comprehensive reports
- Export key asset and condition data into spreadsheets
- Create custom reports to drive key decisions
- Produce capital plans to track and forecast expenditures

FULLY MOBILE SOLUTION

- Provide secure and easily accessible storage
- Increase consistency and accuracy with an intuitive mobile application
- Understand data with custom dashboards and reporting to share with stakeholders
- Conduct surveys on and offline

ANALYTICS YOU CAN TRUST

- Protect data through layers of permissions, authentication and history
- Maintain report integrity regardless of range of inputs
- Raise surveying efficiency with scheduling and alerts
- Boost data collection speed and visibility across your portfolio
