ACCRUENT
MAINTENANCE CONNECTION

ENHANCE YOUR CAFM WITH IOT REMOTE MONITORING & ALARM MANAGEMENT CAPABILITIES

Integrate Maintenance Connection with vx Observe

To operate effectively in 2023 and beyond, your technicians and managers need to be able to consolidate asset data (mechanical or electrical), manage alarms, and react effectively to changes in conditions – no matter where they are.

This requires integrated systems and multi-site, remote capabilities – which is why we offer this CAFM/IoT Closed Loop Integration.

Effective Alarm Management
Utilise alarm filtering and notifications to ensure your teams are aware of asset status.

Work Order Prioritisation
Utilise sensor and alarm information to ensure proper prioritisation of work orders.

Simplified Compliance
Ensure that asset problems are resolved and properly documented to maintain ongoing compliance.
