

# Accurate Engineering Information in the Field Ensures Employee Safety

76% OF ALL WORKERS ARE REQUIRED TO ACCESS THEIR DOCUMENTS WHILE AWAY FROM THEIR DESK

**Meridian Mobile** allows maintenance teams to stay in control of their engineering asset information even when they are away from the desk and ensures access to the latest documents anytime, anywhere.

Expedite project delivery confidently and increase operational efficiency

Prevent costly errors and accidents with 24/7 access to accurate engineering information

Available on iOS, Android, or Windows devices

## ELIMINATE ERRORS THAT IMPACT THE SAFETY OF YOUR EMPLOYEES

The lack of mobile functionality for workers in the field puts your employees at risk and makes it difficult for maintenance teams to prepare for visits on-site. It forces them to guess which documents and drawings they will need on site and print them, which can lead to unknown mission-critical engineering documents left at the office and paper copies being misplaced onsite. Meridian Mobile ensures safety for employees by providing immediate access to their engineering information anytime, anywhere. maintenance manuals and inspection reports, and avoiding non-compliant sites and on-site accidents.

## AVOID DELAYS WITH A SINGLE SOURCE OF TRUTH FOR DOCUMENTS

- Avoid costly rework or unplanned downtime caused by inaccurate or outdated information
- Optimize your valuable engineering data with proven change management process
- Demonstrate compliance with global, local, and industry-specific regulations

## ENHANCE COMMUNICATION BETWEEN TEAMS

- Leverage an organization's diverse workforce and global presence
- Supports multiple languages, such as English, German, and Brazilian Portuguese
- Avoid backlog of work for internal/external teams by approving changes in the field

## OPTIMIZE MAINTENANCE TEAM'S TIME ONSITE

- Easily view assigned to-do lists and complete approvals/ rejection from mobile device
- Ensure maximum visibility and ensure tasks are not missed by users
- View all documents associated with an asset via mobile device, as long as network connection is available

## LEVERAGE ADVANCED SEARCH OPTIONS TO ENSURE SAFETY OF EMPLOYEES

- Quickly find all applicable documents in the field with advanced barcode scanning
- Find commonly used documents easily with saved search
- Filter searches related to a specific property to streamline the process of finding relevant documentation
