

Engineering Information Management Solution for Utilities

ENSURE ACCURATE, UP-TO-DATE ENGINEERING INFORMATION EVERY TIME

With 24/7 access to accurate engineering drawings and documentation, utilities can reduce the average search time for relevant documentation from hours to minutes and stay compliant with different regulatory bodies. Accruent's engineering information management solution establishes a centralized, secure, scalable, highly accessible repository for all engineering documentation. Our solution allows utilities to track all their assets and ensure the revision history associated with these assets is accurate and complete. Accruent helps utilities like RWE, Chugach Electric, Idaho Power, and Seattle City Light run their hydroelectric, coal, gas, power, water, and wastewater plants more efficiently, safely, sustainably, and profitably.

DRAWINGS VERSION CONTROL

Eliminate fears of users working on outdated, incorrect engineering drawings. Utilities can compare and track the revision history of a document or drawing easily.

ROBUST DOCUMENT SEARCH CAPABILITIES

Manage the increasing amount of digital documents with ease by finding relevant documents quickly. This leads to utilities seeing substantial time savings, increased employee production, and faster project completion timelines.

REGULATORY COMPLIANCE

Enable compliance with NERC, FERC, PAS 55, ISO 5500 and other global and local utilities-specific regulations to help minimize risk and avoid costly fines.

MANAGE ALL MISSION-CRITICAL DOCUMENT TYPES

Accruent offers a full CAD-platform independent solution for engineering drawing management where utilities can store, manage, render, and visualize both 2D and 3D content easily from major CAD systems. Organizations keep their master data up-to-date while coordinating their change processes in isolated work areas with workflows, ensuring data validation, and providing a full audit trail for regulatory compliance. Users can also manage Microsoft Office documents, PDFs, scanned images, and hybrid files, allowing our solution to be the ultimate repository for consolidating all legacy and project-related engineering information.

CONCURRENT ENGINEERING

Track all documents to ensure projects run in parallel, without error, which provides utilities real-time visibility to monitor revision from different projects and ongoing maintenance. Project members associated with the same documents and drawings are notified automatically when a parallel project releases updated documents, avoiding unnecessary delays and shortening project turnaround times.

DOCUMENT AND DRAWING MANAGEMENT: Provides version control, revision management, and document workflows in a safe & secure environment so users can be confident that they are working on the most up-to-date documentation.

STANDARD INTEGRATIONS: Enhances efficiency by providing integrations to EAM, ERP, ECM, Microsoft Office, and CAD authoring applications, making it the ultimate repository for consolidating documentation.

ASSET TAG/DOCUMENT RELATIONSHIPS: Provides robust search capabilities and ties documents to asset tags so users can locate documents hassle-free.

ENGINEERING WORKFLOWS: Preserves established control of engineering data changes, safeguarding accurate review and approval steps for effective change control and ensuring safety and compliance.

ENGINEERING TRANSMITTALS: Seamlessly create, handle, and send transmittals and easily route submitted documents through the appropriate review and approval process for maximum security and visibility.

CERTIFIED SECURE CLOUD SERVICES: With the help of Microsoft Azure®, Accruent provides the most comprehensive set of certifications of any cloud service provider.

About Accruent

Accruent is a global software company that helps organizations achieve superior performance by transforming how they manage their physical resources. Its innovative, industry-leading cloud-based software and services enable organizations to optimize all stages of real estate, facilities and asset management, from capital planning through to IoT-based monitoring and control. With a proven track record across two decades, Accruent has created the only integrated SaaS-based framework and reporting platform for full lifecycle physical resource management. More than 10,000 global customers depend on Accruent solutions to drive out hidden costs, extend asset lifecycles, protect their brands, ensure compliance and deliver on the missions of their organization. Headquartered in Austin, Texas, Accruent serves a wide range of industries in more than 150 countries around the world.
