

CYBERSECURITY MADE EASY

Resolve network vulnerabilities and stop cyber-attacks in their tracks

Healthcare organizations are targets for network attacks from viruses and hostile entities. TMS' purpose-built healthcare CMMS provides the monitoring tool integrations, automated security processes and network transparency needed to mitigate cybersecurity risks and prevent a breach.

Block ransomware attacks and prevent hacked medical devices

Give your IT teams the information they need to protect devices on your network and regularly update security protocols

Use configurable dashboards and reports to consolidate information and stay ahead of vulnerabilities

Integrate all of your mission-critical devices and tools for a 360-degree view and actionable insight

CYBERSECURITY IS HEALTHCARE'S BIGGEST THREAT TODAY

With growing reliance on smart, connected medical equipment, hackers are setting their sights on the healthcare system, stealing information, shutting down IT systems, and slowing operations. A modern, purpose-built CMMS is needed to combat this threat and mitigate these modern cybersecurity threats.

STREAMLINE CYBERSECURITY EFFORTS

With comprehensive cybersecurity features and services like:

- Process logic & automation
- Reports and dashboards
- Consistent training on what's new
- Package implementation
- Additional IS/IT-related fields and forms

CONNECT YOUR MOST IMPORTANT SYSTEMS

- Consolidate HFM, HTM, supply chain and IoT onto one platform
- Build and automate flexible workflows
- Automate your preventive maintenance and alternative equipment maintenance tasks (AEM)
- Deliver big data for better analytics

KEEP UP WITH CHANGING REGULATORY REQUIREMENTS

The FDA and other regulatory bodies are constantly updating guidelines to stay safe. A healthcare CMMS can automate compliance tasks and:

- Set notifications
- Schedule routine maintenance
- Track repair history
- Organize important documents (equipment manuals, spec sheets, ID tags)
- Document, record and report on all items
